J. S. HEBERLING

Greetings

Greetings to you as a Friend and as a Customer. This is my opportunity to thank you (each of you) for your good orders of last season and I here and now take pleasure in doing so. I hope the pleasure is not all mine. You make our business possible and we in turn try to see that your orders are filled in such a manner that you are glad to come again the next season. We try very hard to please new customers and doubly hard to please the old ones. Our business is built on repeat orders. We strive to give quality, service, "value received" and satisfaction. Your satisfaction is our pleasure.

FOREWORD

Another growing season is now past and we have just completed harvesting a grand crop of bulbs.

While last season was not generally a favorable growing season because of hot dry weather we had more than our share of local showers assisted whenever needed by a large complete irrigation system which gives our crop this season a size and finish that is seldom seen in gladiolus bulbs.

Should you need some especially large oversize number one bulbs for growing your next season's show flowers, young and high crowned, we have them. Specify JUMBO ONES in your order as we can supply in many varieties. However, your only assurance of them is early orders.

PRICES

We are maintaining prices on standard varieties at about last season's level. This in spite of a 20% increase in labor cost of production and a corresponding increase in most other overhead items of cost. Hence present low prices cannot be long maintained nor should they unless cost can be reduced. Higher prices are inevitable and are justified now. Because of a heavier demand this season many desirable varieties will be sold out at a much earlier date, hence do not count too much on securing the varieties you want at lower prices later.

MASTER MYRON

Master Myron has again proven that it is the giant red of them all. Nothing like it and nothing thus far to compare with it. Enough said.

Please note our "Prepaid Prices" for small quantities and rare varieties, and "Wholesale Prices" for quantities of the same quality at lower prices.

MONEY SAVING COUPONS, on back cover of catalog, please do not overlook. Lastly we offer: Value Received—Quality—Service—Satisfaction.

MASTOR MYRON (*Krueger*)

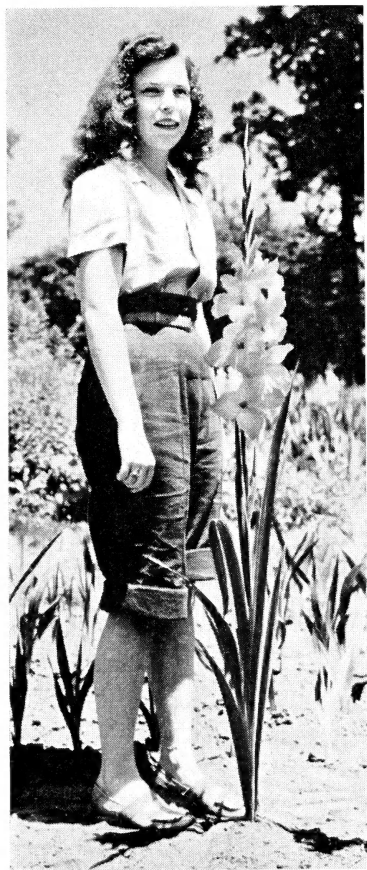

An immense, rich, red self-color 1939 introduction.

Master Myron grows to the height of five or more feet. Possesses a very long, graceful flowerhead about one-half the length of the entire spike. The tallest and most magnificent spike of red that I have ever seen.

The color is a medium red of great richness, and the florets of heavy and enduring substance. Five to seven florets open at one time, and 20 to 22 buds per spike in all. Florets about five inches in size. Classed as a commercial decorative. Produces healthy bulbs and prolific in the production of bulblets. The bulblets germinate well. In all, this variety is very outstanding and remarkably free of faults. Darker in color than Red Phipps but not too dark for commercial use. In fact, it is right. Available stock is yet quite small. This variety has never crooked in our garden.

MASTER MYRON
(Field grown)

Mr. J. H. Heberling,
Easton, Illinois.

Dear Mr. Heberling:

We had more pleasure and satisfaction from growing Glads last season than ever before and especially your new introduction "Master Myron." We grew about six spikes of Master Myron and it was undoubtedly the most brilliant and the largest red we have ever grown.

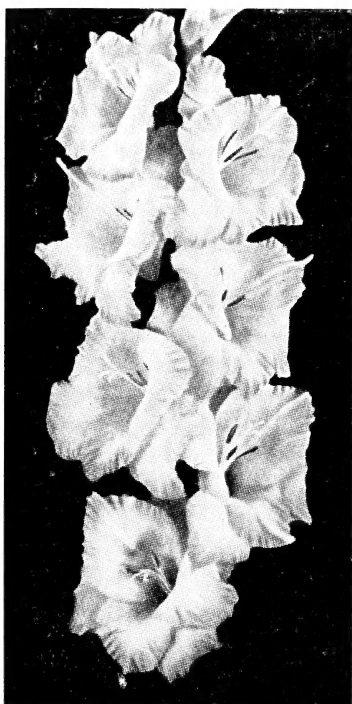

The bulbs were grown as they would be by average amateur gardeners without artificial watering. Some of our spikes grew 57 inches tall. Nine stunning, well placed florets were open at once and some of our florets by actual measurement were $6\frac{3}{4}$ inches across.

Some of the pictures enclosed will give you an idea of the size and beauty of Master Myron as it was in our garden. Our friends were most enthusiastic about the color and the richness and texture of Master Myron.

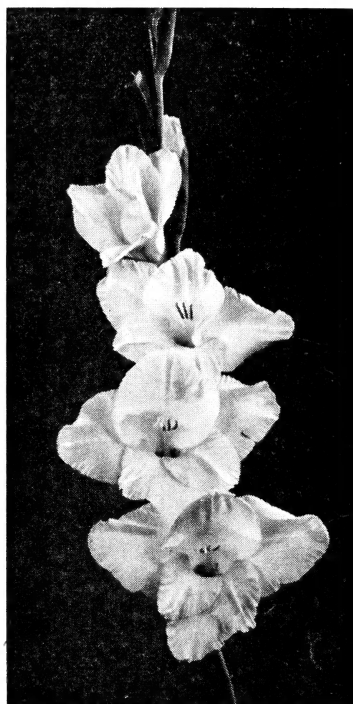

Sincerely yours,

(Signed) MILLICENT R. SAMUELL

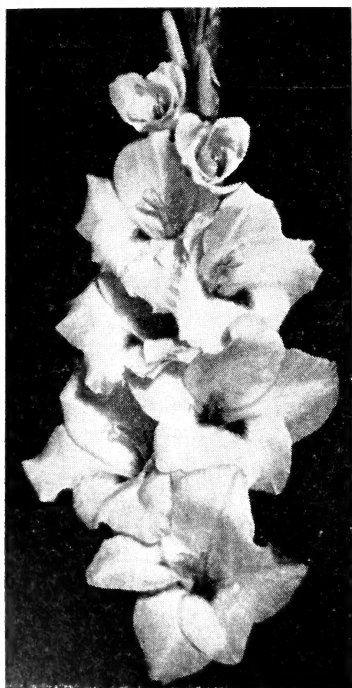

Millwood,
Jacksonville, Ill.
August 28, 1941.

NEW ERA

SHIRLEY TEMPLE

MARGARET BEATON

August 12, 1941.

Dear Sir:

I have waited two seasons before sending you a report as you requested, on Master Myron, a most extraordinary Glad. This season, the one bulb, which I carried over, produced two spikes, both exactly 68 inches in height, with 21 buds making a flower head 26 inches in length. Bottom florets all measured six inches in diameter, with leathery substance. Last year's growth produced 50 bulb-lets from the one bulb, and they are now showing a small spike above rank foliage. An outstanding feature of this Glad, which was also noticed by all florists who saw it, is the exact balance between the length of flower head, and the length of stem below it after cutting. All points considered, as the fellow says, "I think you've got something there."

Yours truly,

R. W. B.

Peace Dale, R. I.

September 21, 1941.

Dear Sir:

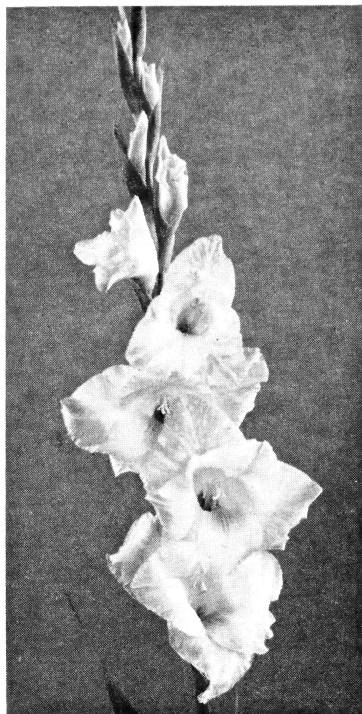

The Gladiolus, Master Myron, that you sent me last spring produced the best red glads I have grown thus far. They bloomed during the worst heat spell we had, and stood as straight as rods, and unfading. They each had one side spike nearly as long as the main one. The size at the blooms was just right (about six inches) for garden and cutting and the color was just the shade that one doesn't have to walk over to see it.

Thank you for giving me an opportunity to have such fine Glads.

Sincerely yours,

MRS. I. W.

Ishpeming, Mich.

BINGO

June 19, 1941.

Dear Sir:

I cut the first Master Myron Glad this morning, with the two lower florets wide open and eight others above showing color.

This spike grew to a height of 46 inches. It is a lovely Glad, I like the richness of its color. A beautiful and lovely red. The placement of the florets is good.

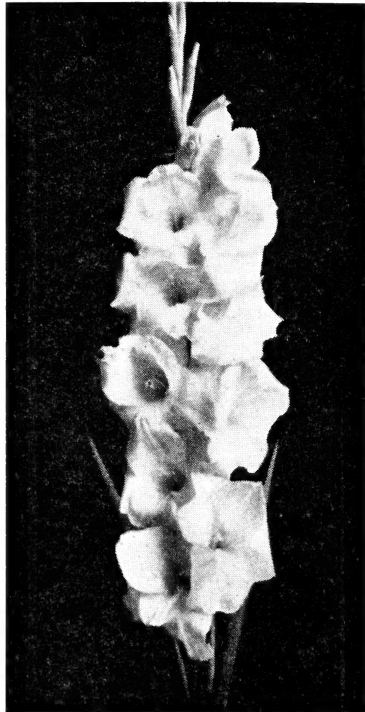

The other bulbs I purchased of you this Spring are coming along nicely.

Hope to buy more bulbs of you next Spring.

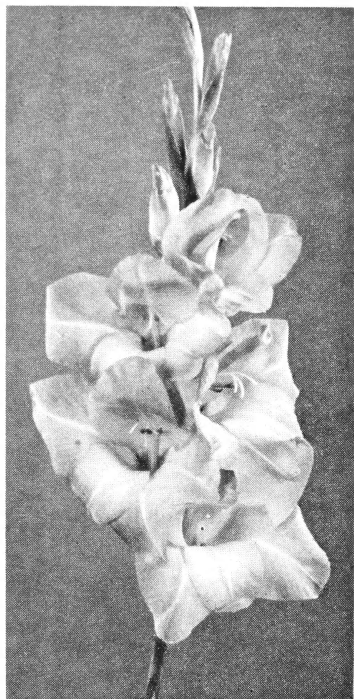

Yours very truly,

B. T.

Oklahoma City, Okla.

ROSA VAN LIMA

HERITAGE

October 16, 1941.

Dear Sir:

I had a spike of Master Myron that was a world beater—perfect in every way; size, color and number of florets out. The Rosalie that you sent me were splendid and I want some more of them.

Sincerely,
W. W. W.

Sharon, Mass.

August 19, 1941.

Dear Sir:

This is to thank you for the splendid bulbs used to fill my order this spring, and also want to thank you for the extras which included Master Myron. This variety gave me a spike that leaves little to be asked for in its color class. Size, color and texture of florets are excellent.

Yours very truly,
B. N.

Sheboygan, Wisc.

September 24, 1941.

Dear Sir:

Master Myron is really something as I had only three bulbs and each one gave a spike of blue ribbon quality. The tallest one was 62 inches with ten open, the next 58 inches and last 57 inches.

At our Waldo Show I took Blue Ribbon with Master Myron.

Yours truly,
B. P. N.

Sheboygan, Wisc.

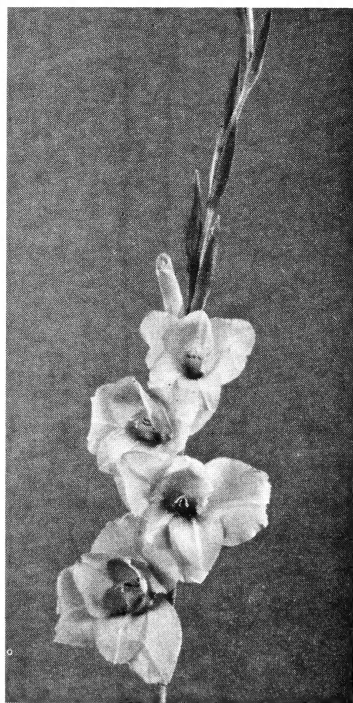

September 1, 1941.

Dear Sir:

Our Master Myron are beautiful this year. I think it will go over big.

Yours very truly,
W. H. H.

Boring, Oregon.

PEGGY LOU

NOTES

SOIL AND FERTILIZER

Any good garden soil is ideal. Glads do well on most any soil if they are planted in the open garden where there is plenty of sunshine and a reasonable amount of moisture. Soil should be well drained. If your soil is not strong, you may apply manure and turn under in the fall, or you may work well rotted manure into the soil in the spring. If manure is not available you may use pulverized sheep or cow manure by putting into the bottom of your planting trench, then covering with an inch of soil, then planting your bulbs. Vigoro is also good. Two or three applications of commercial fertilizer may be made on the surface along the rows during the growing season and before the plants bloom. Any fertilizer should be kept from direct contact with the bulb or foliage. If you wish to grow immense spikes you must fertilize heavily but your plants must also have at least an inch of water every three or four days. Heavy fertilizing with insufficient water will make your spikes a disappointment.

TREATING BULBS

We treat all of our stock before planting with Corrosive Sublimate. One ounce to seven gallons of water. Soak bulbs or bulblets over night in wood container. This treatment is a preventative against scab and rot and also is said to be a sure killer of thrip. We have never had thrip.

PLANTING

Work soil to a depth of eight inches, or ten inches will be better. For large bulbs they should be covered with not less than four inches of soil and many cover them with six inches. The deeper planting help keep them upright when blooming. Smaller bulbs should be planted more shallow but not less than two inches. You may regulate your distance apart in the row by the space you have. Plant rows anywhere from twelve inches to two feet apart in garden, depending on space. Plant in rows from two to six inches apart, depending on space and number of bulbs. They do well planted close together, making fine spikes but require more water. Also you should have richer soil or more fertilizer to get large spikes if planted close. You may, of course, plant in beds, spacing the bulbs about six inches each way.

BULBLETS

In planting the rare kinds it is quite common to remove a part of the hard shell first, then keep in moist cloth or damp sand until bulblets sprout, then plant, covering with about two inches of fine soil. They should not be allowed to dry out during this process of germination. Temperature about 70° F. The commercial varieties are generally put in cloth bags and soaked in water for a day or two or three, then taken out for a day and then put back to soak. This process may be repeated several times until bulblets sprout, then plant.

DIGGING AND STORAGE

With us our early stock is taken up in late September and from that time on we are busy digging until about November first. The bulbs should be taken up within six weeks to two months after blooming but before the tops begin to get brown. Even if tops are green, bulbs should be taken up before the ground freezes deeply. After digging cut off tops close to bulb and put in screen bottomed tray to cure. They should have plenty of ventilation while curing and must not be put in containers more than three or four inches deep. Stir them every few days and keep in dry, well ventilated place. In two or three weeks they will be cured so that old bulbs may be removed from the bottoms. With a few more days to dry they may then be placed in storage.

Bulbs should be dry and free from moisture when placed in storage. The storage temperature is best at 40 to 45 degrees F. However, they do very well at 50 degrees F. if you cannot keep it cooler. Your storage room should be dry, cool and ventilated and as near uniform as possible as to temperature. It is well to look at your bulbs every two or three weeks and see what the condition is, if they are showing signs of too much moisture or looking mouldy, dry them out and give better ventilation. Keep them in small containers and spread thin.

If you have had thrip, use Naphtheline flakes in stored bulbs but not too heavy nor for more than ten days at a time. When your shipment of bulbs arrives unpack at once and open bags, letting in the air. If they appear moist allow them to dry before storing.

OUR GUARANTEE

We guarantee all bulbs and bulblets purchased from us to be true to name, full size, and free of disease and insects, including Gladiolus Thrips. We will replace stock or refund the purchase price of all bulbs and bulblets purchased from us that are not satisfactory, providing that we are notified of the deficiency within eighteen months of the date of purchase. We do not, however, guarantee bulblets to grow.

TERMS

The terms and discounts immediately following apply only to the first section of prices in this price list. They do not apply to the wholesale quotations or to the special offers.

All shipments will be **prepaid**. Please include both parcel post and express addresses. We will ship the cheaper way.

Each order must be accompanied by remittance in full, or a 20% deposit, the balance to be C. O. D.

No order for less than \$1.00 will be accepted. No single item less than 10 cents.

DISCOUNTS ON "PREPAID PRICES"

(For cash in full with order)

On orders of \$ 2 to \$15 we will include 10% in additional bulbs of your selection.

On orders of \$15 to \$25 we will include 15% in additional bulbs of your selection.

On orders of \$25 to \$50 we will include 20% in additional bulbs of your selection.

On orders of \$50 and up we will include 25% in additional bulbs of your selection.

SIZES

Our bulbs are all carefully mechanically graded for size. They are listed in six sizes and bulblets. The bulb sizes are as follows: No. 1 (over 1½ inch), No. 2 (1¼-1½), No. 3 (1-1¼), No. 4 (¾-1), No. 5 (½-¾), and No. 6 (¼-½).

LARGE size bulbs are one and one-quarter inch in diameter or more. This size makes the largest spikes and flowers. Sizes one or two.

MEDIUM size bulbs are from one inch to an inch and one-quarter in diameter. They should make excellent spikes and flowers often as large as made by the larger bulbs. Sizes three and four.

SMALL bulbs are about one-half inch in diameter and often bloom but do not make as large a spike as the larger size bulbs. Under favorable conditions they generally bloom. They often, however, make a better increase than the larger bulbs. Sizes five or six.

SMALL QUANTITIES

Three, five or more bulbs may be purchased at the rate of ten bulbs if desired.

COUNT AND EXTRAS

You will find our count liberal and we feel sure you will be more than pleased with the EXTRAS included in your order. May we suggest a trial order?

SNOW PRINCESS (Pfitzer) A large white with cream throat of extremely good habits. Straight, strong spike, good placement with large flowers of good substance. A good producer of bulblets and a strong growing variety. One of the very best whites.	1 10	.10 .80	3-.15 .50	3-.10 .30	10 100	.10 .80
SOLVEIG (Prestgard) A ruffled white which is outstanding under favorable conditions.	2 10	.15 .60	.10 .40		10	.20
STAR OF BETHLEHEM (Pfitzer) A large pure white.	2 10	.15 .60	.10 .40		10 100	.10 .60
SURFSIDE (Winsor) A tall white with many good qualities and awarded many blue ribbons.	1 10	.30 2.40	.20 1.60	.10 .80	4 100	.10 2.50
SWEET ALIBI (Canine) A large geranium pink opening 8 to 10 six inch florets on 24 inch flower head. A grand new variety.	1 10	.20 1.60	.15 1.20		12 100	.15 .80

Variety	Per	Large	Medium	Small	Per	Bulblets
SWEETHEART (Prestgard) A lovely decorative, white with very delicate light pink edges. Very beautiful.	2 10	.12 .50	3- .10 .25		100	.10
TAIROA (Miller, N. Z.) A large salmon pink with richer throat markings.	2 10	.12 .50	3- .10 .30	.20	30 100	.10 .25
THE BOUNTY (Nitch.) A deep dark red of good form and placement.	1 10	.10 .80	2- .15 .60	3- .10 .40	20 100	.10 .80
TIP TOP (Pfitzer) One of the best scarlet reds.	2 10	.15 .60			10 100	.10 .80
TOKEN (Crow-Pappas) A tall flame salmon, yellow throat. A good commercial.	2 10	.12 .50	3- .10 .25	5- .10 .15	100	.10
TREVONIAN (Hornberger) A very large plant with large white florets splashed with red. Very attractive.	2 10	.15 .60	3- .10 .40		40 100	.10 .20
VAGABOND PRINCE (Palmer) A very large smoky variety, with ten to twelve open florets. Very outstanding.	2 10	.14 .60	3- .10 .30	5- .10 .15	50 100	.10 .15
VREDENBURGH (Pfitzer) We have now grown this variety for several years and to the best of our knowledge it is the largest pure white. Spikes straight and strong, florets very large and pure white with good substance. Very outstanding.	1 10	.10 .80	2- .15 .60	2- .10 .40	15 100	.10 .50
WALK OVER (Pfitzer) A magnificent red with very large florets. A splendid exhibition variety.	1 10	.10 .80	2- .15 .60		10 100	.10 .80
WENONAH (Kinyon) Large salmon pink	1 10	.40 3.20	.25 2.00		10	.30
WHITE GOLD (Scheer) A mammoth cream blended to gold in throat. Early variety blooming in about 70 days. Florets have been measured up to 7½ inches. Petals of heavy substance, ruffled, regularly spaced and well placed on straight spike. Plant and foliage healthy and a good propagator. Bulblets practically all germinate. This is truly an exhibition variety and has already many blue ribbons to its credit. (Originator's description.) However we will stand back of it. (Discounts do not apply to this variety.)	1	2.50	2.00	1.50	1 10	.25 2.00
WHITE ORCHID (Purple) A small delicate white of beautiful form.	2 10	.12 .50	3- .10 .30		30	.10
WINALL (Both) A light violet of merit.	1 10	.40 3.20	.30 2.40	.20 1.60	3 10	.10 .25
WINGS OF SONG (Ellis) A large pink of quality.	1	.25	.15	.10	10	.10
ZUNI (Mitsch) A large spike of silvery rose, an outstanding smoky of merit.	1 10	.10 .80	2- .15 .40		15 100	.10 .40
ZAUBERFLOTE (Pfitzer) A large spike and flower of peach rose with a splash of red in the throat. This is really a rich beautiful variety. Strong and sturdy.	2 10	.15 .60	.10 .35	4- .10 .20	25 100	.10 .30

CREVE COUER

November 1, 1941.

Dear Sir:

My Glads this year were wonderful. They attracted a great deal of attention and many people wondered where I got my bulbs.

The names and addresses of those below asked me to see that they receive a catalog, so if you will, please place them on your mailing list.

Yours truly,

H. C.

New Holland, Ill.

Dear Sir:

Found Master Myron to be a beauty, and Irak sensational, too, but so very late with me.

Thanking you, I remain,

Yours very truly,

O. A. G.

September 22, 1941.

Dear Sir:

I wish to express my appreciation of the performance of the Glads which I had from you. To say that I was particularly delighted with Master Myron is only a very moderate statement.

Sincerely,

C. D. B.

Plainfield, Vt.

August 25, 1941.

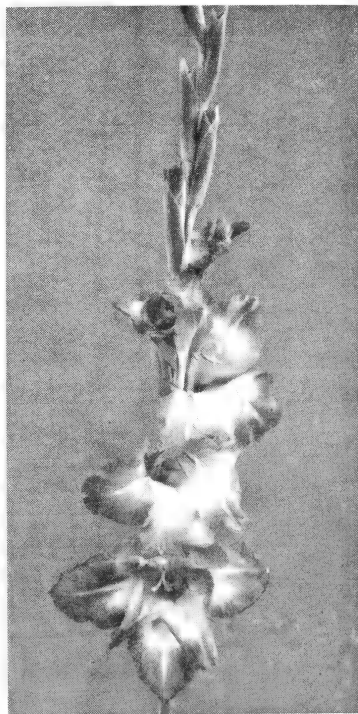

Dear Sir:

You may be surprised that I should inquire at this time, when most Gladiolus are still in bloom, regarding bulbs for 1942. I have seen your Master Myron, and was impressed with it.

Very truly yours,

D. B.

Brooklyn, N. Y.

BEACON

WHOLESALE PRICES

CHARGES COLLECT (F. O. B. Easton)

Twenty-five or more bulbs of same size and variety may be purchased at the 100 rate. 250 or more at the 1000 rate. 1000 at eight times 100 rate.

If sold out of size ordered, will send size smaller, adding more bulbs to make full value unless you instruct to the contrary. These prices are F. O. B. Easton. (You pay the carrying charge.)
